MTS2 Vehicle Safe

- Safe body is manufactured in 3mm thick steel with a door thickness of 6mm steel.
- Size 200mm W x 200mm D x 350mm Long.
- Anti wedge pins in door.
- High security seven lever key lock with an extended stainless steel bolt that locks into 25mm square solid steel.
- Lift up handle in plastic to eliminate leverage attack.
- Hinged door allows 245mm x 172mm access into safe.
- Supplied with kit to provide positive fixing to vehicle floor and quick release fixing handle.
- Black stove enamel hammer finish.

MTS2D. This version allows deposits through a baffle protected access of 115mm x 18mm, without opening safe. Base fixing is similar to that previously mentioned but deposit system does not allow quick release handle. Driver does not need to carry keys.
